PROFESSIONAL SUMMARY

Results-driven AI Engineer with 2+ years of experience in designing, fine-tuning, and deploying Machine Learning and Deep Learning models. Adept at NLP, Computer Vision, and scalable cloud inference pipelines using Python, PyTorch, and Docker.

TECHNICAL SKILLS

- Programming Languages: Python, SQL, C++, Bash
- AI / ML Frameworks: PyTorch, TensorFlow, Scikit-Learn, Hugging Face, Transformers, OpenCV
- Data Processing: Pandas, NumPy, Data Preprocessing, Model Evaluation
- Cloud & MLOps: Docker, FastAPI, Flask, AWS (EC2, S3), Git, CI/CD

PROFESSIONAL EXPERIENCE

AI Research & Development Intern | NeuroTech Labs, Bengaluru (June 2023 - Present)

- Trained and fine-tuned BERT-based NLP transformer models for sentiment classification, improving F1-score by 14% across 250k customer reviews.
- Architected automated computer vision inspection pipeline with OpenCV and PyTorch, achieving 96.8% accuracy.
- Deployed real-time inference microservices using FastAPI and Docker, reducing API response latency by 35%.

KEY PROJECTS

- Multimodal Medical Image & Report Classifier (Python, PyTorch, Transformers, FastAPI)

Designed a deep learning pipeline combining vision transformers and text embeddings. Deployed on AWS with 94% diagnostic screening precision.

- Conversational RAG Assistant with LLM & Vector Database (Python, LangChain, FAISS, Docker)

Implemented retrieval-augmented generation engine indexing 10,000+ technical documents with 98% query retrieval relevance.

EDUCATION

Bachelor of Technology in Computer Science & Engineering (AI/ML)

National Institute of Technology Karnataka (NITK) | Graduated: 2024 | CGPA: 8.9/10

CERTIFICATIONS & ACHIEVEMENTS

- DeepLearning.AI Machine Learning Specialization (Coursera)
- AWS Certified Machine Learning - Specialty
- 1st Place - National Smart India Hackathon (AI Track)
